

## APPENDIX 7: PARKING STANDARDS

The following standards are taken from the adopted Local Plan 1996-2011, and Supplementary Planning Guidance on parking at new developments. They cover standards for car parking, disabled parking, cycle parking, and parking for powered two-wheelers.

The standards for car parking represent maximums, which may be adjusted according to which zone the proposed development is located in (zones are indicated in map10).

Zone Type	Car parking provision allowed in urban areas
1	0-25% of maximum demand-based standard.
2	25-50% of maximum demand-based standard.
3	50-75% of maximum demand-based standard.
4	75-100% of maximum demand based standard.

The ranges shown (expressed as percentages of maximum demand-based standards) identify the degree of restraint that will normally be applied to new development within each zone type. The higher percentage in each range represents the least amount of restraint acceptable (thus imposing maximum standards) per zone type. The lower percentage does not represent a minimum standard, it reflects the break point between adjacent zone types.

**The general presumption is to impose the lower (most restrictive) end of each range. However, having a range allows development to be tailored to particular circumstances.**

## Cycle Parking Standards

Cycle parking standards have been developed for each Use Class. It is recognised that cycle theft deters greater use and thus the type of cycle provision is important. The cycle parking standards differentiate between short and long term requirements. 'Sheffield' stands are satisfactory for short term cycle parking and supervised 'cycle parks' provide better weather and security protection for long term use.

'Full time staff equivalents' is the main parameter used to express long term cycle parking standards as this can be directly related to modal split targets. The long term standards relate to a modal split target of 10% by cycle, but should be adjusted (up or down) locally to accord with local targets and/or those set out in green transport plans. While it is questionable whether realistic estimates of employee numbers will always be possible at the planning application stage, available data on floorspace: worker ratios is inadequate for converting modal split targets to standards based on 'gross floor area' (an alternative parameter).

In addition to cycle parking provision it is also expected that shower and changing facilities are provided. If not built in as part of the normal facilities of a building (in schools and hospitals for example), commercial and institutional uses should consider providing a small room where people can change in privacy. Experience shows that such a facility will not only be used by cyclists, but other staff engaged in exercise activity during lunch breaks or after hours. It need not be looked on as a burden.

For commercial and institutional uses, shower and changing facilities should be provided at a minimum rate of 1 locker per 10 persons and 1 shower cubicle per 50 persons.

Proposals for a reasonable level of provision for fewer personnel will be assessed on their merits according to the location, use and travel needs of the personnel.

### **Powered Two-Wheeler Parking Standards**

Motorcycles comprise around 3% of all registered vehicles, and recent large increases in sales of mopeds and other commuter machines have resulted in further demand on existing motorcycle parking places, with indications that this trend will continue. As a guide, local authorities should set aside around 5% of the total stock of publicly accessible motor vehicle parking space for motorcycle use. Local authorities should also take steps to ensure that workplaces, new developments, and other parking not under their direct control, includes sufficient provision to ensure pressure is not simply concentrated on local authority provision.

Powered two wheeler parking should therefore be provided at approximately five per cent of the amount of car parking to be provided on a site. Each use needs to be considered on its merits
