Hi Claire,

Please find attached additional information in relation to application ref. 21/0573/FUL.

This includes a response, prepared by RSK Acoustics (formally Cole Jarman), to the Cass Allen Report relating to the application. The response clearly demonstrates that outcomes of the Cole Jarman noise assessment report 19/0333/R2//2 are valid and wholly sufficient to ensure existing receptors will be protected from adverse noise impacts/effects.

Also attached is an NVC Survey and Species list as requested by Hertfordshire Ecology in their response dated 13/04/2021. The survey results reconfirm the previous studies that the grassland community at Maple Lodge lacks diversity.

Many thanks,

Matthew Pigott
