Subject: RE: Maple Lodge, noise survey data

Hi Matthew

I spoke with our barrister and the rest of the team earlier today and am able send you the raw data. I'll compile it into a clearer format and get it over to you asap.

I have also now received your Proof of Evidence and note that you have remodelled the site operations. I would be interested to know where the differences in results have come from and also to understand the relative contributions between delivery activities and HGV movements (as you rate them separately) to noise levels at the nearby receptors. Would you be able to send the model through along with any assumptions you made?

Thanks
Sam

Subject: Maple Lodge, noise survey data

Hi Sam,

Thanks for taking my call. As discussed please can you send me your raw survey data from Maple Lodge and any report/relevant info which goes with it.

If you have any questions please don't hesitate to contact me.

Regards

Matthew Heyes
